

BHASKAR ANAND

Industrial AI & Asset Performance | Reliability Engineering | Power & Process Industries

Bengaluru, India | bhaskar2006anand@gmail.com | [linkedin.com/in/bhaskar-anand-apm](https://www.linkedin.com/in/bhaskar-anand-apm) | [bhaskar2504.github.io](https://github.com/bhaskar2504)

PROFILE

Industrial AI and asset-performance professional with 15+ years across thermal power operations, performance engineering, commercial power operations, process analytics and enterprise AI implementation. I work across plant engineering, reliability, product, software and ML teams to translate industrial problems into technically grounded, deployable solutions.

15+ years	1,700+ models	500+ models	50 KPIs
Power & industrial systems	Cumulative Industrial AI/APM model work	Current large-scale utility implementation	Engineering definition / validation support

CORE SCOPE

- **Industrial AI & APM:** predictive maintenance, anomaly interpretation, failure-mode diagnostics, RCA/FMEA/RCM and KPI-driven decision support.
- **Implementation:** discovery, functional design, asset hierarchy, tag mapping, historian integration, validation, UAT, adoption and handover.
- **Engineering analytics:** time-series analysis, process modelling, performance monitoring, what-if studies and data-quality validation.
- **Leadership:** cross-functional coordination across plant, reliability, customer, product, software and ML teams; technical reviews, training and governance.
- **GenAI:** RAG, citation-grounded outputs, structured responses, evaluation, guardrails and human escalation for engineering workflows.

PROFESSIONAL EXPERIENCE

Senior Technical Consultant

Aug 2022 - Present

Industrial AI & Asset Performance | Bengaluru, India

- Lead end-to-end Industrial AI/APM implementations from requirements and data readiness through engineering validation, UAT, adoption and handover.
- Coordinate customer, plant, reliability, product, software and ML teams; translate engineering needs into functional specifications, workflows and product requirements.
- **Model scale:** 1,000+ models across the first three years of the role, ~220 models retrained/validated in the 2025 cycle, and 500+ models in a current large-scale utility implementation - more than 1,700 models cumulatively.
- Defined / validated 50 engineering KPIs; supported 3 production deployment renewals and handovers; delivered 9 customer training sessions plus internal onboarding.
- Develop reusable failure-mode, tag-validation, KPI and implementation frameworks to improve consistency and technical governance.
- Build and evaluate GenAI / agentic-AI workflows grounded in industrial context, engineering evidence and human review.

Senior Analyst

Oct 2021 - Mar 2022

WiseEnergy | Hyderabad, India

- Worked in Commercial & Billing, supporting invoice verification, reconciliation and commercial reporting.

Senior Consultant

Aug 2019 - Oct 2021

Uniper | Noida, India

- Delivered power-plant flexibility, performance monitoring and process-modelling work across thermal and combined-cycle contexts.
- Used historian and process data to investigate plant behaviour, efficiency and operating flexibility.

Deputy Manager - Performance Monitoring, Commercial & Power Trade

Sep 2018 - Aug 2019

Odisha Power Generation Corporation (OPGC)

- Worked across performance monitoring, efficiency analysis, RCA, scheduling, DSM, billing and power-trade activities.

PROFESSIONAL EXPERIENCE - CONTINUED

Lead Engineer / Executive Engineer

Jun 2010 - Sep 2018

Tata Power | Mundra, India

- Worked across thermal-power operations, commissioning, performance reporting and commercial support.
- Supported operation and commissioning of a 400 kV switchyard and developed plant-side judgement across control-room and field operations.

Data Analysis Intern

Jan 2015 - Jun 2015

Seagate Technology | Singapore

- Applied data analysis, statistics and scripting to industrial process-data investigation.

SELECTED TECHNICAL PROOF

- **Industrial GenAI Reliability Copilot:** public project with RAG, structured evidence, citation validation, guardrails and human escalation. Current evaluation: 7 targeted retrieval cases, 6 passing, 85.7% precision@1, 100% citation-ID accuracy, source-locator completeness and repeated retrieval consistency.
- **Engineering case studies:** public-safe diagnostic examples across rotor dynamics, air-preheater performance, cooling hydraulics, pump systems and instrumentation credibility.
- **Engineering assurance toolkit:** reusable checklists for failure-mode mapping, industrial tag validation, sensor data quality, calculated KPIs, predictive alerts and Industrial AI implementation.

EDUCATION

M.Sc., Electrical & Electronics Engineering	Technical University of Munich	2013 - 2015
M.Sc., Electrical & Electronics Engineering	Nanyang Technological University	2013 - 2015
B.Tech., Electrical & Electronics Engineering	KIIT University	2006 - 2010
Power Plant Familiarization	National Power Training Institute	2010

TOOLS & METHODS

Industrial historians / time series - Predictive maintenance - APM - RCA / FMEA / RCM - Process modelling - KPI frameworks - Python - MATLAB - GenAI / RAG - Functional design - UAT - Technical training

SELECTED TRAINING & RECOGNITION

- 830 MW Supercritical Unit Simulator training
- Data Science and Python Programming credentials
- Recognition for contribution to commissioning and operation of a 400 kV switchyard
- Recognition related to implementation of PAT Cycle-2
